# SPECIAL FINISHES

## ART SURFACE AND INTERIOR DESIGNER

**The Art Surface and Interior Designer** is the most creative expression of our tailor-made approach. The dynamism of our team made up of artists, art designers and artisans, selected over years of work and experience, makes every working really unique.

Finishing and decoration are perceived as style. We have created a new language through applications and the analysis of **texture, patterns, colours and matters.**

We think of matter **as a new skin**, as a tailor-made dress, in its most visionary form:  
**metallic, translucent, rough, worn-out, sensory.**  
Every working is caressed by glance, is materialized by touch, and it evokes the timeless recall of the origins of matter.  
Polyhedral extensions, perfect details, harmony of effects giving life to unique and precious **works of art design.**

# LIQUID METAL

## RESEARCH, CREATIVITY AND UNIQUENESS

**The liquid metal** is a precious and innovating matter, made with 90% metal powder mixed with resins to obtain a covering similar to the original metal, but with higher performances as for scratch and solidity resistance.

The result of these surfaces is really extraordinary: the material has all the features typical of metal, like air-contact oxidation, electric conductivity and the typical coldness, while giving **a soft and silky tactile sensation**.

This material offers the possibility to cover every support with an extremely thin layer, following any kind of bending and shape: **copper, brass, bronze, white bronze, zinc, steel, aluminium** are the latest developments of these state-of-the-art components. Our creations in liquid metal merge style and prestige, proposing new borders.
